
AGREEMENT BETWEEN VETUS NOVUS AND HAMA'LU: A CLIMATE FAIR WILL BE ORGANISED IN LIMBUS

Vetus Novus is experiencing an enormous exodus of their younger population in the past few years. The Concilium and the Inferiors have attempted to avoid this exodus, but unfortunately without effect.

After a few analyses, it became clear that the main reason for the exodus is the modern system in the neighbouring country of Hama'Lu. Hama'Lu stands for freedom, innovation, prosperity, equality and unity. Therefore, they want you to be able to be who you are and what you like. And they are extremely advanced in their ecology. Vetus Novus's climate policy has already caused several manifestations recently, making it clear to the Concilium that changes had to be made.

The Concilium of Vetus Novus and the demarchy of Hama'Lu gathered yesterday for an important conference. Both countries were eager to prevent the exodus. A solution finally emerged, namely a Climate Fair Monday 10 January 2022 in Limbus, the modern Vetus Novus city located 5 kilometres from Hama'Lu's border.

The Climate Fair will be comparable to a Christmas market, but there will be various booths related to a positive sustainable impact on the world. Sustainable companies from Hama'Lu and Vetus Novus are being invited to come and promote their sustainable products, free of charge.

In addition, some well-known speakers will be asked to give a speech on climate. The representatives of the Vetus Novus demonstrations are also welcomed to discuss their views.
